1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-9, drawn to a microwave plasma sterilizing method.

Group II, claims 10-11, drawn to a microwave plasma sterilizing device.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common special technical feature of Groups I-II is microwave-excited volume-wave plasma discharge in the gas for sterilization. This special technical feature does not define a contribution over US Patent No. 4,931,261 (see abstract; col. 2, lines 29-58).

2. A telephone call was made to Mr. Christopher Wickstrom on 5/11/09 to request an oral election to the above restriction requirement, but did not result in an election being made. Mr. Wickstrom is no longer with the Rader, Fishman & Grauer PLLC and a representative requested a written restriction.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 1797
